感谢您使用云蚁1080p云台摄像机

1. In the box

2. Getting to know the Camera parts

3. General Introduction

a) Powering on and off:
Place the camera close to the router, and make sure Wi-Fi access is available, then connect the cable to the Micro USB port on the back of the camera to the power outlet as shown.

b) Downloading the App

- Download and install the "YI Home" APP on your smartphone.
- Scan the "YI Home" APP QR code displayed below, and follow the instructions to install the APP.
- If you already have a YI account, login directly, and follow the prompts on the interface to add new device, or else create a new account first.

背面:

4. Mounting Instructions

Note: The mounting wall should support at least 3 times the total weight of the bracket and the camera.

Fix the base tray to the wall with the screws.

Install the device.

5. Basic parameters

Resolution: 1080x1080
Lens: F2.0/1.66"
Audio: Built-in Mic/Speaker
Video compression: H.264 High Profile
Enhancement: 3D Noise Reduction
Power Consumption: 4.0W(Max)

Notification: Activity Alert
Night Vision: IR Cut + non-invasive LEDs
WiFi: 802.11n/4G+
Support Platforms: Android/iOS
Wireless Security: WEP/WPA/WPA2
Power Supply: DC 5V/1A(Micro USB)

Manufacturer: Shanghai Xiaoyi Technology Co., Ltd
Website: www.yitechnology.com
Service Telephone: +86-21-67165 8722
E-mail: support@yitechnology.com
Address: 10F, Building 1, No.515, Huanku Road, Shanghai, China

The device complies with Part 15 of the FCC Rules / Industry Canada (except for RSS standards). Operation is subject to the following two conditions: (1) the device may not cause harmful interference, and (2) the device must accept any interference received, including interference that may cause undesired operation.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'utilisation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, they cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.

Under Industry Canada regulations, the radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than that necessary for successful communication.

Conformément à la réglementation d'Industrie Canada, le présent émetteur radio peut fonctionner avec une antenne d'un type et d'un gain maximal (ou inférieur) approuvé pour le récepteur par Industrie Canada. Dans le but de réduire les risques de brouillage radioélectrique à l'égard des autres utilisateurs, il faut choisir le type d'antenne et son gain de sorte que la puissance isotrope rayonnée équivalente (p.i.r.e.) ne dépasse pas l'intensité requise à l'établissement d'une communication satisfaisante.

MPE Requirements
To satisfy FCC / IC RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of the device and persons during device operation. To ensure compliance, operators at closer than this distance is not recommended.

Vis us vni o

Les antennes installées doivent être situées de façon à ce que la population ne puisse être exposée à une distance de moins de 20 cm. Installer les antennes de façon à ce que le personnel ne puisse approcher à 20 cm ou moins de la position certifiée de l'antenne.

La FCC exige à titre préventif que tout appareil doit être en tout temps éloigné d'au moins 20 cm des personnes pendant son fonctionnement.
